Accreditation is based on the competence and ability to effectively apply the requirements of the relevant certification standards listed in the Conformity Assessment Bodies' scope of accreditation. Accreditation determines the technical competence, reliability and integrity of Conformity Assessment Bodies. UNIVAB's accreditation entails review of the Conformity Assessment Bodies' own management system, on-site assessment of the Conformity Assessment certification processes, review of Conformity Assessment Bodies' access to expertise including onsite observation of the Conformity Assessment Bodies' when conducting Conformity Assessment Activities. Accreditation does not imply endorsement of the products or the design or performance characteristics of products certified by the Conformity Assessment Bodies.
